

## Gislingham Parish Council – Footpath Report 17 February 2025

### General Maintenance

Ken Larcombe has delivered some new footpaths posts, which I will site one at the new bridge, as mentioned in my January report and another at the corner of the FP 28 which crosses the field and meets near the new bridge.

### Railway Crossing FP 22

I resident mentioned to me that he saw workman making a new footpath at the end of the woods on FP 21, which is over the railway bridge near Spring Farm. He asked what they were doing and this will be the diversion route when the railway crossing on FP22 will be closed. The new footpath will run around the field and meet up in the gap in the hedge where the current FP is.

I contacted SCC for an update and although we have known that this crossing has been earmarked for closure, they have not been informed of any date, but knew that a diversion footpath would be installed. It is a case of 'Watch this Space'.

### Replacement Posts

The missing posts have still not be replaced, so I will be contacting Ken Larcombe again this week.
